

Formula Student Electric an der TU Graz

Energiesymposium 2012

Agenda

- Formula Student
- Der Bewerb
- Geschichte des TU Graz Racing Teams
- Das Team
- Herausforderung eines FS-Electric Boliden
- Konzept 2011 & 2012

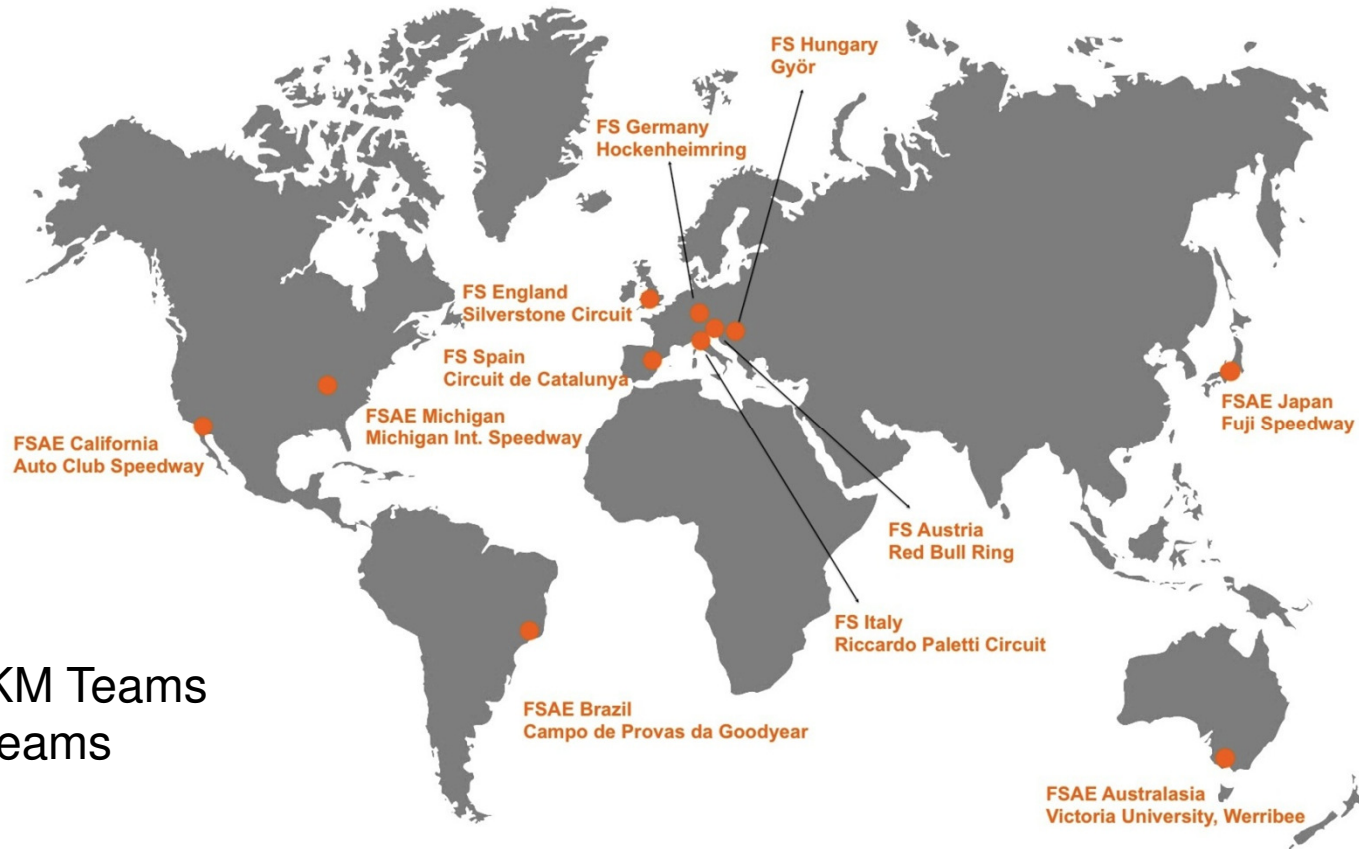

Formula Student

- Mini Baja Series (1976)
- Formula Student (2010)

Formula Student

> 400 VKM Teams
> 80 E-Teams

Der Bewerb

- Hauptaugenmerk nicht nur auf Technik
 - Wirtschaftliches Denken
 - Verkaufsplan
 - Präsentation

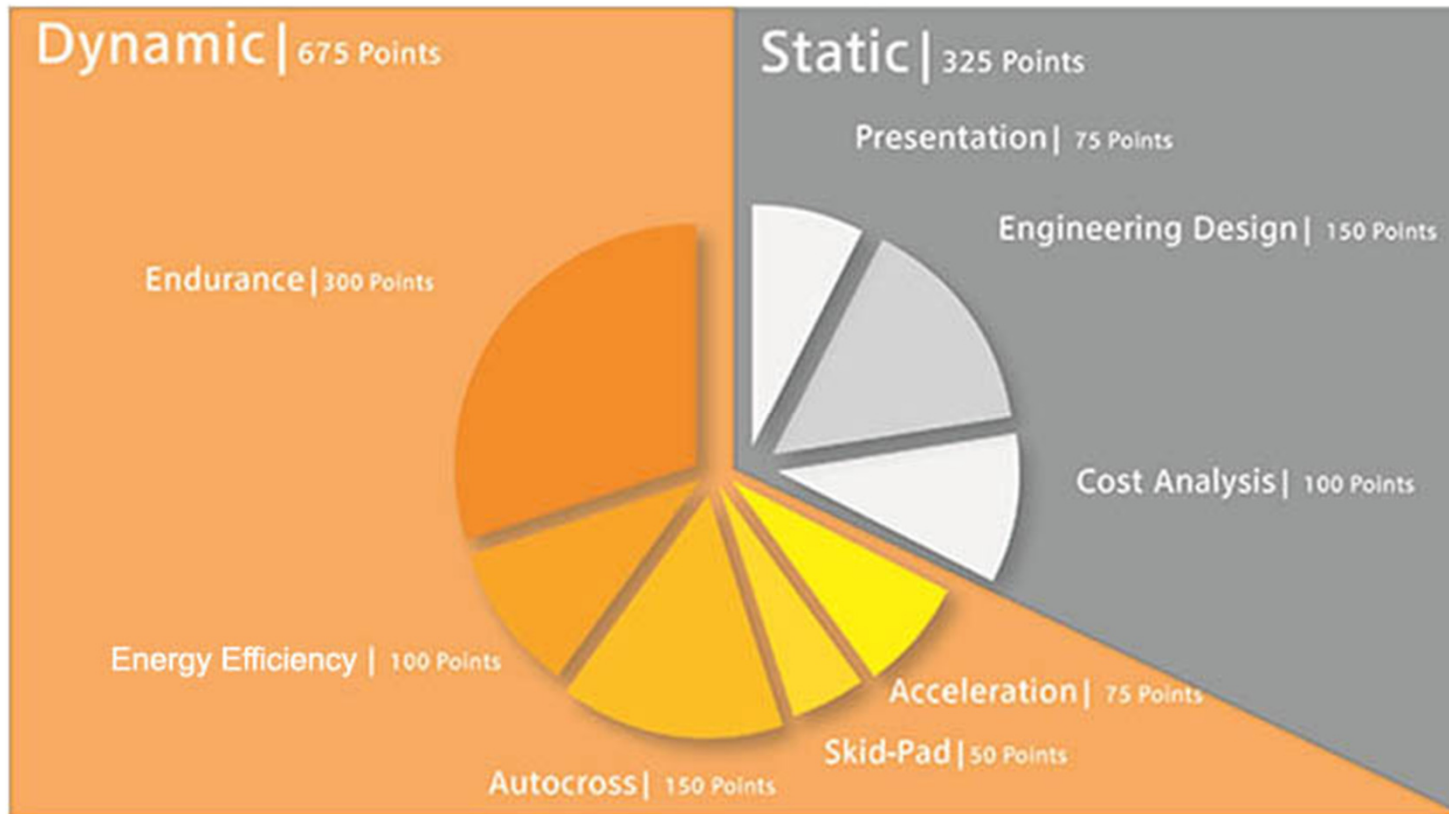

Der Bewerb

- Statische Disziplinen
 - Engineering Design
 - Cost Analysis
 - Business Presentation
- Dynamische Disziplinen
 - Acceleration & Skid-Pad
 - Autocross
 - Endurance & Energy Efficiency

Der Bewerb

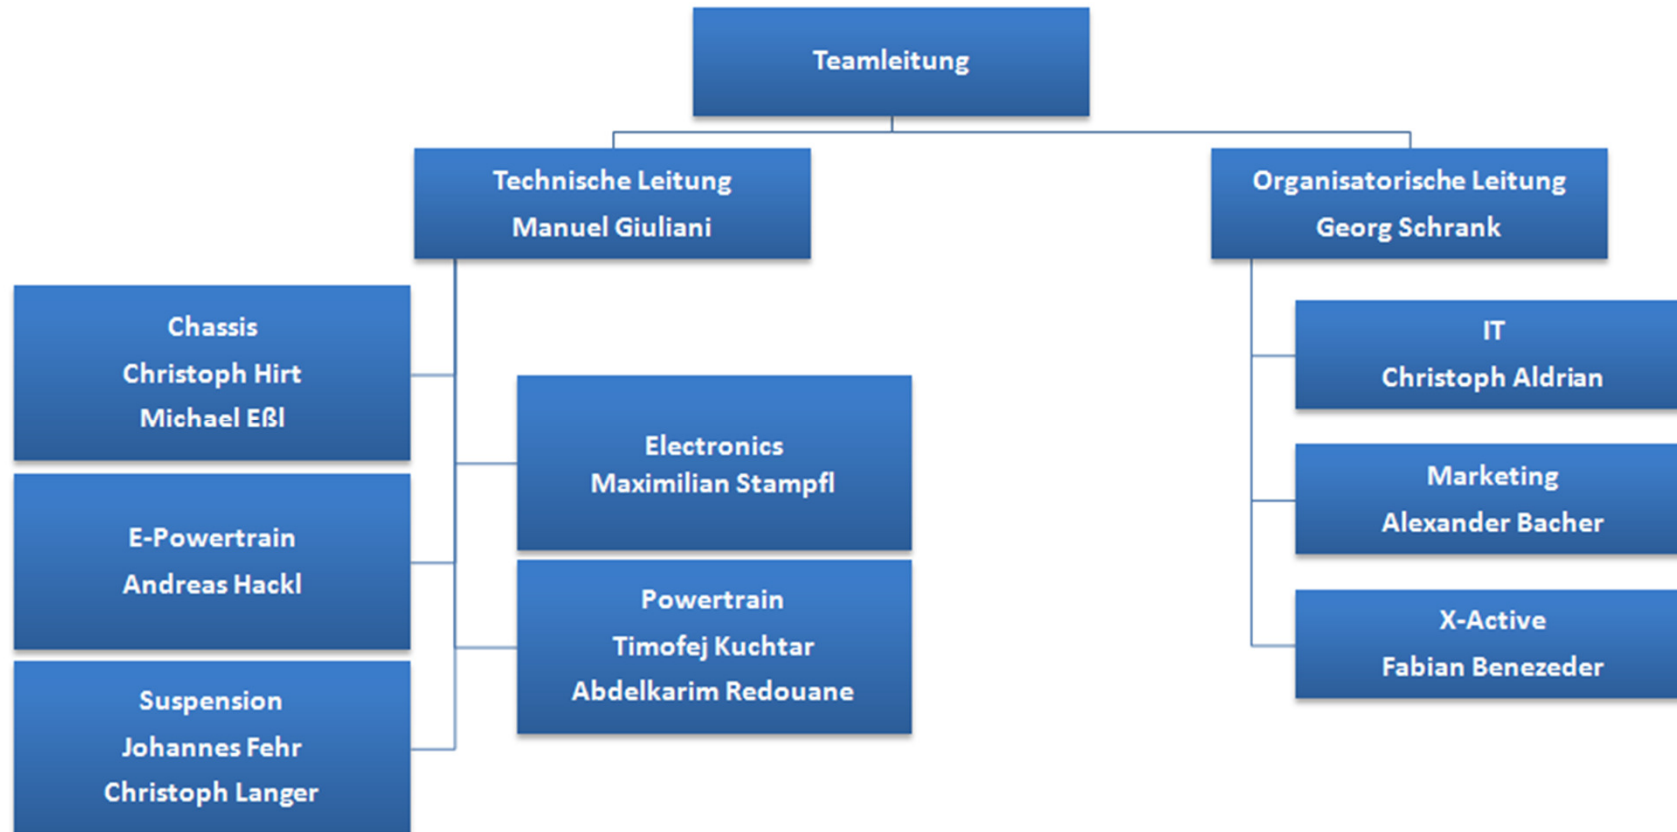

Geschichte des Racing Teams

- 2002 - Teamgründung TU Graz Racing Team
- 2010 - TU Graz e-Power Racing Team
- 2012 – Zusammenschluss der beiden Teams
 - TU Graz Racing e-Power
 - TU Graz Racing c-Power

Das Team

Herausforderung

- Besonders effizientes Fahrzeug bauen
 - Energierückgewinnung erlaubt
- Optimaler Antriebsstrang
 - Kompromiss Gewicht, Leistung, Kosten

Herausforderung

- Raintest
 - Kontrolle Dichtheit
- Fahrdynamikregelung
 - Torque Vectoring
 - Traction Control

Konzept 2011

Konzept 2011

Konzept 2012

Konzept 2012

- 1 Fahrzeugkonzept, 2 Antriebssysteme
 - Plattform
- Leichtbaukonzept
 - Faserverbundwerkstoffe, Leichtmetalle
- Energieeffizienz

Konzept 2012

- Antriebsstrang
 - 2 Synchronmotor
 - Offenes Motorsteuergerät
- Energieeffizienz
 - Selbstentwicklung Batterypack
 - 300V Zwischenkreisspannung
- Fahrdynamikregelung
 - 2 Spurmodell

Konzept 2012

Danke für Ihre Aufmerksamkeit!

Energiesymposium 2012
