

## CALL FOR PAPERS

### e+i Special Issue on Emerging Topics in Power Electronics

The recently established Power Electronics section of Electric Drives and Machines Institute at the Graz University of Technology and the editors of the technical-scientific journal e+i elektrotechnik und informationstechnik (edited by the OVE Austrian Electrotechnical Association | published by Springer Vienna) cordially invite you to submit a paper for e+i's special issue on „Emerging Topics in Power Electronics.“

The aim of this special issue is to highlight emerging topics in power electronics and to give an overview of the numerous activities in the field of power electronics.

The topics of interest include but are not limited to:

- Power electronic topologies
- Power semiconductors (WBG technology, etc.) and corresponding driving concepts
- Modeling and control of power electronics
- Automated design of power electronics
- Reliability and converter monitoring
- Power electronic applications (integration of renewables, EV-charging, motor drives, high-power converters, etc.)

#### Important dates:

Indication of planned paper submission:	July 31, 2022
Full paper submission deadline:	September 30, 2022 (hard deadline!)
Reviewing process and notification of acceptance/rejection:	October 31, 2022
Submission of final paper:	November 30, 2022
Publication date:	February 2023
