#### 12 – 13 September 2016: Professional Training on Green Mobility and System Integration

*Location: Brussels, Belgium.*

eseia organized on the 12-13 September at its new Brussels Hub a Professional Training on the topic of Green Mobility and System Integration. The participants had the chance to generate understanding of **State-of-the-art of electric vehicle and infrastructure related technologies**. Moreover, the participants could get an in-depth overview on the complexity and challenges related to the integration of smart mobility into the existing infrastructure system, and the role of the stakeholders in such process.

In two days, the following issues have been covered: future mobility and trends in automotive industry, energy sources, provision and conversion in the mobility sector, future mobility - the stakeholder's demand and requirements on technologies and sustainable mobility in the region of Graz. Lectures were given by Prof. Mario Hirz and Helmut Brunner from the Graz University of Technology - Institute of Automotive Engineering.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement N° 690925

##### BET - BioEnergyTrain

The first Technical and Financial Report of the BioEnergyTrain has been submitted to the EC. It reports on all the work performed and achievements that have been reached in the first 15 months of the project. An additional review meeting with the European Commission was held on the 27<sup>th</sup> of September, which went successful.
