

## Copyright and Terms of Use

The Valley dataset depicts parts of Capo di Ponte (Italy) and zooms in to a prehistoric heritage site called Seradina Rock 12C. The dataset consists of four scale levels. The closest scale level (level 0) shows prehistoric rock engravings. The images and (in particular) the 3D reconstruction of the engravings are protected by copyright. The copyright owner is the Italian State. For specific questions concerning this copyright please contact the Centro Camuno di Studi Preistorici (CCSP)([info@ccsp.it](mailto:info@ccsp.it)).

Concerning the Valley dataset, the CCSP and Graz University of Technology agreed on the following terms of use according to the art. 108, 3 of the D.Leg. 42/2004:

- The provided data can only be used for promotion and research purposes and cannot be used for any economical purposes without explicit consent of the copyright owner.
- 3D reconstructions of the rock engravings cannot be made publically available without explicit consent of the copyright owner.
- Reproductions of the 3D reconstructions (i.e. screenshots and videos) can be published for scientific dissemination, however, the authors agree to send an email to the CCSP ([info@ccsp.it](mailto:info@ccsp.it)) containing the following information: authors, title, name of publication medium and short abstract.

I herewith agree with the terms mentioned above. I also agree that this document is archived at Graz University Technology and the Centro Camuno di Studi Preistorici (CCSP).
