

TU Graz Data Team - Participate at Scientific Shared Task

The TU Graz Data Team¹ is a group of students working on data science projects. They work together as a team on challenges posted on Kaggle and similar competitions. The goal of this thesis is to select a scientific challenge (often also called shared task for scientific challenges) and participate in this challenge. In contrast to typical data team efforts, the solution and implementation needs to be conducted by the author of the thesis.

Goals & Tasks

- Select a suitable shared task (challenge)
- Research the relevant related work
- Implement a solution for the posted challenge
- Evaluation of the proposed solution

Qualifications

- Interest in data science.
- Interest in cooperation with other data team members.
- Experience with software development.
- Registered to one of the following:
 - ✓ **Bachelor Thesis**
 - ✓ **Seminar Project**
 - ✓ **Master Thesis**
