

# Advanced Ego-Vehicle Motion Estimation

Used to achieve precise localization and tracking

*Motion models for vehicle dynamic behaviour*

Constant position

Constant velocity

Constant acceleration

Constant turn

Constant turn rate

... and their combinations

*Vehicle sensors*

GPS

Lidar

Camera

Radar

IMU

**Sensor fusion**

*State estimation techniques*

**Kalman filter**

**EKF**

**UKF**

**Particle filter**

**EHF**

**$H_\infty$  filter**

**UHF**

Robust, reliable and real-time knowledge of the vehicle states
