1 Introduction

1.1 Example of a Figure

Before you compile the main document ”Thesis.tex”, change the content of the setup.tex file!

This is an example of a figure (see Figure 1.1)

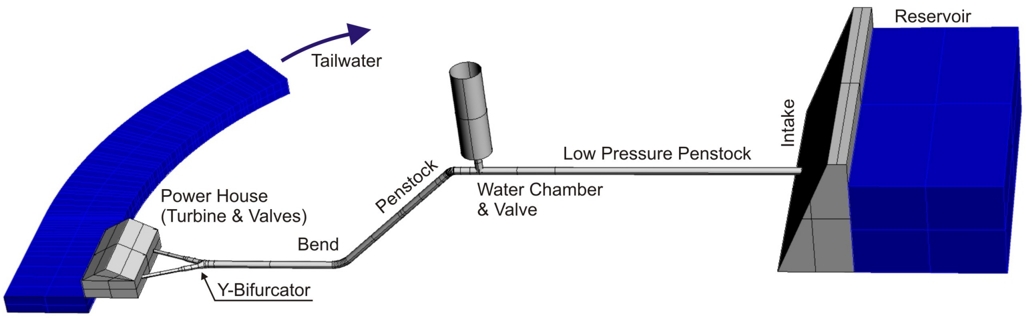

Figure 1.1: *Sketch of a general layout of a high-head pt*

Here comes more text Here comes more text

Here comes more text Here comes more text

1.2 Example of Equations

Here are some equations .....
Equation Eq. 1.1 is the famous Bernoulli Equation ....

$$z_1 + \frac{P_1}{\rho g} + \frac{V_1^2}{2g} = z_2 + \frac{P_2}{\rho g} + \frac{V_2^2}{2g} + \Delta h_{tot} \tag{1.1}$$

Equation Eq. 1.2 are 3 aligned equation

$$\begin{aligned} Term_1 &= \frac{\zeta_{Resistance}}{2 \cdot g \cdot A_{throttle}^2} \\ Term_2 &= -B - R \cdot |Q_{Pipe1}| - B - R \cdot |Q_{Pipe2}| \\ Term_3 &= H_{Pipe1} + B \cdot Q_{Pipe1} - H_{Pipe2} + B \cdot Q_{Pipe2} \end{aligned} \tag{1.2}$$

1.3 Example of a Table

Example of a table . . . Table 1.1

Table 1.1: *Components of PIV*

Laser	Litron Laser - Model: LDY303-PIV, Repetition rate: 0.2 - 10 kHz with 21.5 - 1.85 mJ, λ=527 nm
Camera	Photron FASTCAM SA-1 Camera, 5.4 kHz, $1024 \cdot 1024$, 16 GB Memory
Object lens	AF Micro-Nikon, 60mm f/2.8 D
Software	Dynamic Studio 2.20.18

1.4 Example of a literature reference

This idea is based on Anderson [1995]. In the Thesis.bib file all authors are listed; A .bib file can be created very easily with `www.zotero.org`.
