**Opinions of participants about „Summer School” in Poznań University of Technology**

„Summer School in Poznan is a live example of how one can spend time not only with fun, but also with education. Not for a second did I regret that I took part in the School. Why? Because I obtained new knowledge and met new people. And that is, definitely, important in everybody’s life. A diverse programme of the School, excursions to the well-known Polish enterprises, interesting practical lectures, hospitality of the organizers and Polish students, the beautiful city of Poznan – all that made our week an unforgettable event. I am grateful to everyone, who was engaged and took part in the Summer School!”

“I am very satisfied with participation in the Summer School in Poznan. I enjoyed everything, because every day was planned with maximum efficiency. I have never had a chance to take part in such events and I am very happy that I finally got that possibility. I am glad that I had an experience connected with taking part in classes with the topic, actual for me, communicating with students who study in the Poznan University of Technology, exchanging impressions about students’ life and just spend some time in a wonderful friendly atmosphere.”
