

20th INTERNATIONAL SYMPOSIUM ON **FLAVINS & FLAVOPROTEINS**

THIRD ANNOUNCEMENT

July 11-15, 2021 in Graz, Austria

The 20th International Symposium on Flavins and Flavoproteins will be held in Graz, Austria. In view of the persisting global health concerns the symposium will be organized as an on-site and on-line event. The symposium will highlight recent developments in the field of flavin-dependent proteins and processes. The program will include lectures by invited experts in the field as well as young investigator talks and poster sessions. All oral presentations will be streamed and made available as a recording on our website.

The field of flavin-based biochemistry and flavoenzymology will be highlighted in sessions on:

- Application & Engineering of Flavoenzymes
- Flavoenzymes in Health & Disease
- New Flavins & Flavoproteins
- Photobiocatalysis by Flavoenzymes
- Flavin-dependent Photoreceptors
- Structure-Function Relationships in Flavoenzymes

**More information will be soon available

Scientific Committee:

Pimchai CHAIYEN (VISTEC,
Thailand)

Brian CRANE (Cornell
University, USA)

Kiyoshi FUKUI (Tokushima
University, Japan)

Giovanni GADDA (Georgia
State University, USA)

Matthias MACK (Mannheim
University of Applied Sciences,
Germany)

Milagros MEDINA
(University of Zaragoza, Spain)

Bruce PALFEY (University
of Michigan, USA)

Anne-Frances MILLER
(University of Kentucky, USA)

Nigel SCRUTTON
(University of Manchester, UK)

Organizing Committee:

Peter MACHEROUX

Gustav OBERDORFER

Andreas WINKLER

(Graz, University of Technology)

Karl GRUBER

Wolfgang KROUTIL
(University of Graz)
