

WE MAKE YOUR LIFE EASIER

OUR TOOLS

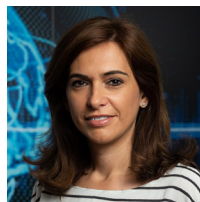

- **Machine-actionable Data Management Plans (maDMPs):**
Semi-automatic creation and management of DMPs
- **CyVerse Austria:**
Collaborative platform for RDM and data analysis
- **Electronic Lab Notebook (ELN):**
Innovative documentation connected to CyVerse Austria
- **InvenioRDM:**
Repository for long-term storage of reusable and citable data

OUR SERVICES

- **Information Hub:**
We are the contact point for all things about RDM and related networks (e.g. RDA, GOFAIR, The Carpentries, EOSC, CEASER)
- **Community Engagement:**
 - RDM projects at TU Graz (e.g. RDM Marketplace)
 - Coordination of Data Champions program
- **Training and Individual Support:**
We offer general and discipline specific trainings on RDM and our data stewards provide individual support for researchers

WE BRING STRUCTURE TO YOUR DATA

Your partner for all topics related to RDM:

Dr. Ilire Hasani-Mavriqi

Head of RDM TEAM

We work together with you to create the conditions for the future of data-driven science

DIGITALE TU GRAZ

Vizerektorat für Digitalisierung und Change Management
Handlungsfeld Forschung

PROBLEM: HANDLING RESEARCH DATA IS BECOMING A COMPLEX AND TIME CONSUMING TASK

- Have you lost your data due to failure of your hard disk?

- Do you have to repeat an experiment because you lost your data?

- Do you spend a lot of time searching for results because of poor documentation?
- Do you want to learn more about proper documentation using metadata standards?

- Do you want to replicate an experiment from a former PhD student?
- Do you work with proprietary formats and have troubles sharing data?

- Are you looking for a repository to safely store and publish your data?
- Does a publisher require a DOI for the dataset related to your publication?
- Do funding agencies ask for your RDM strategy?

APPROACH: RESEARCHER-LED RDM TOOLS AND SERVICES

The RDM Team combines technical and data steward support to find the best approach to solve your RDM problems.

Our key principles are:

Research data: As open as possible and as closed as needed

Tools: As general as possible, as discipline-specific as needed

Services: Reduce manual work via automatized RDM workflows

SOLUTION: AN ENVIRONMENT WHERE RDM IS PART OF THE DAY-TO-DAY RESEARCH PRACTICE

The RDM Team helps you. We offer tools and services for efficient RDM to make your data **FAIR**!

We support all aspects of RDM, including how to:

- **organise your research data adequately**
- **store and document data appropriately with metadata**
- **use innovative tools for documentation of experimental parameters**
- **provide easy access to research data**
- **publish your research data**
- **comply to funder mandates**

We make your data **FAIR**

Findable Accessible Interoperable Reusable
