

# ARCHITECTURE BEYOND THE LINE

## CLIMATE CRISIS - ARCHITECTURES OF CHANGE

Future Lab | Sommersemester 22

*„Right here, right now, is where we draw **the line**. The world is waking up, and change is coming whether you like it or not.“*

With her emotional speech at the UN Climate Summit in New York on September 23 2019, Greta Thunberg once again proved that she wants to shake up ALL of us for the climate. Why? Because we face our civilization before the biggest crisis. For decades, we know that our CO2 emissions must

be radically reduced. Now we have 6 YEARS left to implement massive changes in our way of life and in our systems so that we can keep the max. 1.5 DEGREES of warming that were set in Paris 2015 binding yet reach. Little time for one of mankind's greatest tasks!

What can we do? What can each one of us do? How can this task become a task for students of architecture and architects? What does the 'architecture' look like in this great social task? What kind of spaces do we have to create and design? These questions arise in the Futurelab in the summer semester 2022 as well as our responsibility as humans and also as scientists. We will discuss, research, develop, design and act together!

### DATES

Do. 12.05.	9-13 Uhr	Start Up! / Research
Fr. 13.05.	9-13 Uhr	Research
Do. 19.05.	9-17 Uhr	Design
Fr. 20.05.	9-13 Uhr	Design
Do. 02.06.	9-12 Uhr	Presentation

### COURSE

Future Lab (153.807)  
Wahlfach 2 SWS (3 ECTS)

### APPLICATION

14.02. bis 14.03.2022

### WHERE

Seminarraum Felsmechanik ATEG 032

### WHO

Dipl. Ing. Andreas Goritschnig
