

**Anna Schreuer** holds Master's degrees in mathematics from the University of Vienna and in Science and Technology Studies from the University of Edinburgh. In 2015 she completed her doctoral studies in Science and Technology Studies at the University of Klagenfurt. Since 2006 she has worked as a researcher and research coordinator at the Interdisciplinary Research Centre for Technology, Work and Culture (IFZ) in Graz, the Department of Science, Technology and Society Studies at the University of Klagenfurt, as well as the Doctoral Programme Climate Change and the Institute of Environmental Systems Sciences at the University of Graz.

In her research, she deals with innovation and transformation processes in the energy and mobility sectors from a social science perspective. She has studied grassroots innovations in the energy sector, regional innovation and transformation processes towards sustainable energy provision, everyday mobility practices among young adults and the challenges and potentials of reducing academia's heavy reliance on air travel. In her current position at the STS Unit, Anna works on user and stakeholder involvement in energy research projects, including projects supporting TU Graz itself on its way to climate neutrality.

#### Main fields of research

---

Sustainable and participatory innovation; Socio-technical change; Sustainability transitions
