

Peter Obersteiner, MSc, holds a bachelor's degree in management and a master's degree in Environmental Systems Science Innovation- and Sustainability Management.

In his master's thesis, he investigated social perspectives around the construction of the Lobau Highway in Vienna in the context of a sustainable mobility transition. The thesis was part of the research project "TransFair" by the Institute of Environmental Systems Sciences at the University of Graz, where he worked as a student assistant. Besides his scientific work, he gained experience in various companies in the fields of project management and social entrepreneurship.

At the STS Unit, he will apply different methodological approaches to investigate expectations and pathways of hydrogen technology in Styria.
