

Soma Rahmani is a postdoctoral researcher with bachelor's degrees in Health Care Management, a Master of Business Administration (Executive Management), and a PhD in Science and Technology Policy Making. She obtained her degrees from the University of Tehran and the University of Mazandaran in Iran, and completed exchange and research stays at Lund University in Sweden. She has held postdoctoral research fellowships at the Institute for Advanced Studies on Science, Technology and Society and the Human-Centered Computing Institute (STS Unit) at TU Graz, as well as at the Department of Environmental Systems Sciences at the University of Graz. During these fellowships, she co-authored publications with international collaborators and contributed to the development of national funding programs. As Principal Investigator, she worked to develop project for the Austrian Science Fund (FWF) on emerging hydrogen justice and governance in Global North–South partnerships, and for the Austrian Research Promotion Agency (FFG) on developing Diversity, Equity, and Inclusion (DEI) measurement frameworks for Austrian organizations, with particular attention to the role of equity and justice in technological and innovation systems. Her research focuses on the interactions between sustainability transitions, justice, and social change.

Main fields of research

Sustainability transitions, Socio-technical change, Energy policy, Justice
