

Surbhi Singh is a doctoral candidate at the Centre for Studies in Science, Technology and Innovation Policy at Central University of Gujarat, India. Her research focuses on regional innovation systems specifically taking into consideration the peculiar geographical boundaries to inspect the growth of low carbon technologies in a region. She was awarded a M.Phil. in May 2019 for the title “Mapping Energy Landscape of Andaman and Nicobar Islands with special reference to Innovation in Solar-based Technologies” submitted at Central University of Gujarat. She completed her MSc in Physics from the Department of Physics and Electronics at Banasthali University, India and a Diploma in Audio Engineering from the same university. She did her undergraduate studies at Pondicherry University, India; where she graduated in Physics majors.
