

Lilia Yang is holding two Master's of Science degrees in Environmental System Sciences focusing on sustainability-oriented Management as well as Business Administration from the University of Graz and Linné University. Currently, she is a PhD Candidate at the University of Graz, conducting research on data-driven circular business models in collaboration with Magna International as her case study. In August 2022, she founded oikos Consulting, an association aimed at training impact-oriented sustainability consultants and future change-makers.

At the STS Unit, she is working on Klim 2030 and Climate Neutral TU Graz 2030, performing management tasks, conducting reports, and consulting the Provincial Government of Styria on their sustainability strategies.
