December 6th, 2019

Examination mode

**"Basics of Electrical Power Systems (432.001)",
"Electrical Power Systems 1 (432.002)",
"Electrical Power Systems 2 (432.003)",
"Planning and Operation of Electrical Power Systems (432.119)",**

- The exam takes place in written form, with exam dates available online.
- Time duration for the exam: 2,5 h
- The exam consists of theoretical questions and calculation examples. In the Teach Center or on request in the secretariat an exercise script is available. The appendix of this tutorial (formulas and tables, if available) will be handed out during the written exam and so is available during the exam. The written exam is based on these documents, but these do not claim to be complete. The learning of the material from the lecture notes for the exam is therefore strongly recommended!
- If the written exams for the lecture **"Electrical Power Systems 2 (432.003)"** is positive, an oral exam takes place about a week later in the library of the institute (Inffeldg. 18/I). The exact date will be announced during the written exam. If desired, also for the other courses an additional oral exam can be arranged in the secretariat if the written exam is positive.
- The exam does not allow any tools that allow viewing documents (eg laptop, mobile phone, TI NSpire).

Regards

Prof. Robert Schürhuber
