

Submission of Abstracts for the 68th Annual Meeting of the Austrian Physical Society: Guidelines for Authors

G. Pottlacher, T. Neger, and S. Brunner

Institute of Experimental Physics, Graz University of Technology, Graz, Austria

pottlacher@tugraz.at

The authors are requested to follow the recommendations given below when preparing their abstracts for the 68th Annual Meeting of the Austrian Physical Society to be held in 2018 from September 11th - 14th at Graz, organized by the Institute of Experimental Physics at the Graz University of Technology. This page should serve as an example for the abstract's format.

The textwidth has to be set to 16 cm, as font type and size Times New Roman 12pt are recommended throughout the abstract. The total number of characters of the body text including references should not exceed 2000 characters! The head of the abstract includes - each item spaced by a blank line (see above) - a boldfaced written title, the author(s), their affiliation(s), and the email address of the corresponding author. The name of the presenting author should be underlined. In case of several authors working at different institutions please do not forget to indicate this by corresponding numbers for authors and affiliations. The body text should be separated from the head by two blank lines.

It is a long tradition that diploma/master students frequently submit and present their first scientific papers at annual meetings of national physical societies. Therefore some general outlines for the preparation of abstracts are mentioned here briefly. A short abstract has to be a very concise description regarding context, objective, method, results (only the most important) and conclusion concerning the work reported of. It serves mainly for the quick orientation of an interested reader as a rough overview about a topic. The usual length of the abstract is not more than 300 words! Figures, tables and references should not be included as far as possible. Non-standard or uncommon abbreviations should be avoided, but if essential they must be defined at their first mention in the abstract itself. For further details please contact your supervisor before submitting your paper.
