APRIL 9, 2019
6:00-8:00 PM
Graz University of Technology is internationally recognized as an innovative institution with a pronounced inclination towards excellence in industry and economy. As a consequence, start-ups aiming at the forefront of high technology are being considered as an integral part of the university’s value chain.

Falling Walls as an international program with a clear focus on excellence addresses both, outstanding ideas with a strong potential of realization and the ability to quickly present an idea as a sort of intellectual finger food – appetizing, delicious and easy to grasp.

Prof. Dr. Hans Sünkel
Jury chairman, former rector Graz University of Technology
